

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY JUNE 17, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was moderate in the Rocky Mountain, Eastern Great Basin, Southwest and Western Great Basin Areas, with 221 new fires reported. Two new large fires were reported, one each in the Alaska and Southern Areas. Two large fires were contained, one each in the Southern California and Southwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Nevada, New Mexico, Texas and Utah.

SOUTHWEST AREA LARGE FIRES:

LIZARD, Coconino National Forest. This fire is burning in pinyon pine and juniper, nine miles southeast of Flagstaff, AZ. Significant runs with spotting up to one half mile ahead of the front were observed. Personnel are conducting burn out operations. Interstate 40 was closed.

DRY LAKES COMPLEX, Gila National Forest. A Fire Use Management Team (Goheen) is assigned. This lightning caused Wildland Fire Use complex, comprised of the Dry, Lake, Sycamore and Moonshine fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish resource objectives. Short, uphill runs and backing were observed in pinyon pine, ponderosa pine, grass and mixed stands of conifer. Crews are preparing existing trails for a possible burn out operation on the Moonshine Fire.

PICACHO RESERVOIR, State of Arizona. This fire is in grass and brush, eight miles north of Picacho, AZ. The fire is slowly backing on the east flank with occasional torching observed. Engine crews are monitoring the fire perimeter.

MORGAN, Gila National Forest. This lightning caused fire is in the Aldo Leopold Wilderness Area, 34 miles west of Truth or Consequences, NM. The fire is in ponderosa pine, grass and mixed conifer with heavy dead and down fuels. No new information was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
LIZARD	AZ	COF	1,100	5	UNK	95	1	8	0	0	72K

ASF = Apache-Sitgreaves National Forest

ALASKA AREA LARGE FIRES:

SAND CREEK, State of Alaska. This fire is burning in black spruce and tundra 25 miles northeast of Delta Junction, AK. Minimal fire behavior was observed, with creeping, isolated torching and some short crown runs in heavier fuels. Indirect line is being constructed for a planned burn out operation.

LEFT BANK, State of Alaska. This fire is in black spruce, 30 miles northeast of McGrath, AK. Moderate fire behavior was observed. Heavy fuels are hampering containment efforts, however good progress was made using wet line construction.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
SAND CREEK	AK	AKS	6,500	NR	UNK	83	4	0	2	1	2.2K

EASTERN GREAT BASIN AREA LARGE FIRES:

ANNA LAURA SPRINGS, Uintah and Ouray Agency, Bureau of Indian Affairs. This lightning caused fire is 57 miles south of Fort Duchesne, UT in steep and rugged terrain. Erratic winds caused active fire behavior in oakbrush, sagebrush, aspen, juniper, pinyon pine and Douglas fir. Crews are constructing handline and mopping up.

MMU = Mariposa Unit, California Department of Forestry

OUTLOOK:

Weather Discussion: Warm high pressure will remain in control of western weather for one more day. However, instability during the heat of the afternoon will spark showers and thunderstorms once again in eastern Arizona, northward along the Continental Divide and into the northern Plains. Instability will also produce afternoon storms along the central Sierra crest and eastward into the Great Basin. In Alaska, central interior sections will remain mainly dry, with only an isolated threat of an afternoon thunderstorm.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<p>ALASKA AREA South-Central Partly sunny. Scattered showers and a chance of thunderstorms.</p> <p>Central Interior Partly cloudy with scattered showers and wet thunderstorms in the north and east.</p>	<p>50s and 60s</p> <p>60 to 75.</p>	<p>30% to 45%</p> <p>25% to 40%</p>	<p>Variable 5 to 15 mph.</p> <p>Northeast 5 to 15 mph.</p>
<p>EASTERN GREAT BASIN AREA Partly Cloudy region-wide except sunny western Idaho.</p>	<p>68-88 in the mountains, 80-94 in the valleys except 94-101 in the valleys of southern Utah and the Arizona Strip.</p>	<p>Idaho, western Wyoming, and northern Utah 10-28%. Southern Utah and the Arizona Strip 6-16%.</p>	<p>Light in Idaho, northeast winds 5-20 mph in Utah.</p>
<p>ROCKY MOUNTAIN AREA Isolated to scattered and thunderstorms. Some storms dry western Colorado.</p>	<p>80 to 90, 65 to 75 mountains and Black Hills region</p>	<p>10 to 20% western Colorado, southwest Wyoming and south central Colorado. 25%-35% elsewhere</p>	<p>Variable winds 5 to 15 mph</p>
<p>SOUTHWEST AREA Partly cloudy. Slight chances for dry thunderstorms west of the continental divide, with scattered wet thunderstorms to the east.</p>	<p>70s and 80s mountains and 80s and 90s lower elevations, except near 107 southwest AZ deserts.</p>	<p>5-20% west, 20-40%+ east.</p>	<p>Upslope/upvalley 5 to 15 mph in AZ & western NM, with some gusts to 20-25 mph in AZ. Winds east to southeast 10-15 mph across eastern NM and west TX</p>

TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

When fighting wildland fires, it is often easy to get committed to areas that put you in Watchout Situation #17. As firefighters progress along the fireline, it is imperative to constantly keep the following considerations in mind:

- Does the crew's condition allow for fast travel? Discuss physical and mental conditions that could interfere with a crew's ability to travel quickly.
- Will you get adequate warning to make it to your safety zone? Who will you rely on to warn you? How will you ensure that everyone gets the word?
- Can escape routes be improved to make travel to safety zones faster? Are escape routes marked? Review what you have done on past fires to locate, mark, and improve escape routes.
- Will posting more lookouts give adequate warning? Talk about situations where there was more than one firefighter assigned to be lookout.
- To reduce the risks:
 - Consider other tactics that will allow you to be in a safer location. Review fires where you have had to change tactics because escape to safety zones was not adequate.
